\*\* Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.

## INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.  
PCT/FR 00/00116**V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

1. Statement		
Novelty (N)	Claims	YES
	Claims 1-6	NO
Inventive step (IS)	Claims	YES
	Claims 1-6	NO
Industrial applicability (IA)	Claims 1-6	YES
	Claims	NO
Citations and explanations (Rule 70.7)		

The following documents have been cited in the Search Report:

- D1: WO 98/11714 A2
- D2: JP 08 317376 A
- D3: EP 0961493 A2
- D4: DE 4110649 A1
- D5: GB 2260880 A
- D6: DE 4339075 A1

D1 discloses a security system for an automated teller machine comprising cameras, sensors, and a communication interface. Each camera includes an image capture section, a processing section, and a temporary image storage section. The cameras transduce the images to the form of electrical pixel signals, convert the electrical pixel signals to a digital format and store the digitized images. Before storage or transmission, the digitized images can be compressed to conserve space on digital storage media. A bi-directional serial interface enables communication between the cameras and a computer, e.g. to transfer images to the computer or to send operating instructions to the cameras. External sensors that detect a change in conditions are also connected to the cameras.

D2 shows a monitoring device comprising a camera, an analog to digital converter, a signal compressing unit, and a storage unit. Successive images are compared to detect any changes.

Consequently, the subject matter of claims 1-6 fails to meet the criteria of novelty and inventive step. Industrial applicability is given.
